

EDUCATION : CASE STUDY 3

Datacom Installation

SEC Datacom was commissioned to install a full Category 5 SCS configuration with fibre optic backbone across the whole campus of the largest College at one of the oldest and most prestigious Universities in the country.

The project involved detailed discussions with the Client at the design stage due to the complexity of the installation. A prime Client driver was to fully cater for existing needs and also allow for future development.

Key features of the chosen design involved:

- Blown fibre as a backbone.
- Empty Microducts at each outlet for expansion.
- Facility for fibre to be 'blown' to the desk.

The seven month project, valued at over £120K required close liaison at all times to ensure none of the fellows had their studies disrupted. Thus continual project management was essential.

SEC has maintained a strong working relationship with this University of a period of several years.

SEC Datacom is the specialist system integration business of Southern Electric Contracting, offering a consultative and independent approach to all cabling and hardware solutions.

SEC, Building Services Awards Major M&E Contractor of the Year (2004 and 2005) and Electrical Industry Awards M&E Contractor of the Year (2005), is part of the Scottish and Southern Energy Group and is committed to delivering projects on time, on budget and SAFELY.
