

## EDUCATION : CASE STUDY 4

### Datacom Installation and Services

SEC Datacom enjoys a close working relationship with the University Estates Team at a major University in Berkshire and has been a Preferred Contractor for over six years. During this time a wide variety of works and services have been provided, from structured cabling systems and voice networks through to new fibre backbones and laser 'point to point' wireless links.

The upgrading of voice and data cabling within various buildings on one of the Campuses has been one of the most challenging contracts. This £250K contract involved the installation of new containment systems within environmentally difficult areas, whilst causing minimal disruption to the teaching facilities which had to continue throughout the period of works.

SEC Datacom was awarded the Measured Term Contract valued at approximately £100K per annum to supply data cabling services for 2 years with the possibility of this being extended for a further 2 years.

Systems installed include:

- Brand-Rex, Molex, Hellerman Tyton, Krone and Siemon Cat5 UTP Structured Cabling Systems
- Brand-Rex Multimode and Singlemode Fibre Optic Cabling
- Laser Point to Point Wireless links
- Emtelle Blown Fibre
- Voice Cabling

From a single data outlet to complete major refurbishment, SEC Datacom has provided a responsive and quality service to all of the University Campuses.

SEC Datacom is the specialist system integration business of Southern Electric Contracting, offering a consultative and independent approach to all cabling and hardware solutions.

SEC, Building Services Awards Major M&E Contractor of the Year (2004 and 2005) and Electrical Industry Awards M&E Contractor of the Year (2005), is part of the Scottish and Southern Energy Group and is committed to delivering projects on time, on budget and SAFELY.
